

Her searches as shown on screen: terms, settings, dates

Americans for Non-Profit Transparency · Source pack · Her searches as shown on screen: terms, settings, dates

Source file: HER_SEARCHES.md, as it stood on 7 October 2026. Published for checking. Internal cross-references to other files were left as written; private names, non-Latin search strings and local file paths were removed. Google Trends dates in this file are what Google returned at the time stated; Trends redraws its sample.

Her Google Trends searches - full inventory for on-camera re-runs (TASK B, 2026-10-06)

Machine-readable: her_searches.json (same folder). Every chart was read by eye on the 1080p scan frames (danks_escobar_work/ana_scan/out/<id>/NNNNN.jpg) Or on frames pulled from the local source mp4s (bmjVylJelZc, stew_v7cowxi). No Google Trends query was run for this inventory.

Counts: 47 distinct loads. usable (every string exact + settings readable) = 25; partial = 11; unusable = 11.

How to read a row - *Terms* are in her chip order (= Trends colour order blue, red, yellow, green, purple). A term marked ... was cut off; where we recovered it, the JSON says from where (tooltip / later frame / her own words). - *Her result:* tooltip = exact numbers she hovered; measured = our pixel read off her axis ticks (+-1 day; ticks listed in the JSON); spoken = her words with the timestamp. - *Re-run URL:* paste as-is. All her charts use **All categories**. Image Search = gprop=images; Web Search = no gprop. - Every chart she shows is the **classic Explore** layout (the 'why you switched back to classic Explore' banner is visible on Aug 17 - Sep 2 frames). Open the URL, and if Trends opens the new Explore, click 'classic Explore' so the screen matches hers. - Geo codes: Tucson (Sierra Vista) AZ = US-AZ-789 and Las Vegas NV = US-NV-839 are confirmed. NE/KS/TX metro codes are the Nielsen DMA numbers (likely, check in the picker). Israel districts (IL-Z north, IL-D south) and Giza (EG-GZ) are ISO codes - **unsure**, pick the region from the dropdown on camera instead. - **Privacy:** rows flagged ADDRESS or private person: blur the chip on camera; never read an address. By her method a name was 'searched FROM' the Fort Huachuca area - never 'on base' / 'was there'.

ID	Terms (in order)	Region / geo	Range	Type	Her result (how known)	Ready?	Already re-run?	First appearance

What is NOT in this table (and why)

- **Danks' live re-runs in the Jul 16 collab** (a1ObeHOaq1k / nPzWaSXbpHs, 0:11-2:37) are skipped as instructed. Her own Stew Peters charts that were replayed inside the collab ARE in: S22 (her Stew chart, side by side at 1:04:40), S13 (Hansell 4-term, collab 37:31) and S17 (DIA 5-term, collab 41:31).
- **Oct 3 (wmLijWb4bcM) date slides:** checked all 79 dated frames by eye (contact sheets). They are person cards (name, photo, title) and the Canva sheet - **no Trends chart on any of them**, so nothing to re-run from Oct 3. The only search-like items there are the sheet rows.
- **Sep 26 (nxbuNswDPpA) sheet:** checked all 62 dated frames. Canva sheet + UVU timeline only. The two Trends charts on screen are replays of older episodes: S23 at 34:00 and S28 at 55:15 (both carry the '34 | What Happens In Vegas' overlay).
- **The Jul 15 Stew Peters show itself** (danks_escobar_work/ana_src/stew_v7cowxi.mp4) shows about 20 more chart loads between 58:10 and 2:05:15 (file seconds 3490-7515), many of them the same sets as the Jul 9 stream (S13-S16, S18). Only the charts named above were inventoried. **Follow-up:** a second pass on that file could add those loads (frames at 3490-3690, 4000-4330, 4605-4945, 5220-5510, 5600-5980, 6370-7115, 7245-7275, 7505-7515).
- **Districts not on screen:** S10 Victor Marx - she says she also ran Center (Jul 11 / Jul 7), Haifa (nothing), Jerusalem (nothing) and South. Only North is on screen.

Quick picks for the on-camera re-run (exact strings, settings readable)

1. **S03** 'ISRTE-PLTR Erica Lane Frantzve' (her Sep 6 slide) - re-runs so far: Aug 11, then no data.
2. **S04** 'ISRTE-PLTR Alexander C Karp CEO' (her 'badge label' Sep 8 slide) - exact string never run on camera.
3. **S22** her Stew chart - two re-runs already, neither matched; a third on camera completes the set.
4. **S35/S36** Burton Hibbs - same words, only the capital C differs (Trends ignores case). Her screenshot said Sep 7; her live load said nothing. She called that 'wiping'.
5. **S23** Las Vegas 'cluster' (Jul 23 tooltip 100/99/0/0/0) - shown in 4 uploads and never re-pulled.
6. **S06** Zinn in Georgian - the slide says FROM FORT HUACHUCA, the chip says Utah (logged in GAPS_NEW N3). Re-run with geo=US-UT **and** with US-AZ-789 to show the difference.
7. **S21 vs S20** Bailey + Justin Davis - the same names on the same day gave Image Sep 4/6 and Web Aug 12/Sep 8.
